Frontend-разработчик

As a frontend developer, I have a passion for creating stunning websites and user-friendly admin panels. I excel at utilizing HTML, CSS (including SCSS), and popular libraries such as Bootstrap or TailwindCSS to build visually appealing and functional web designs. Additionally, I am skilled in the VueJS framework and use it to create dynamic and responsive applications, while utilizing JavaScript or Typescript for the logic part.

With a deep desire to continually enhance my skillset, I am also expanding my knowledge to include Angular. I believe that staying on the cutting edge of web development technologies and trends is crucial to delivering top-quality products that meet the needs of modern-day users.

Overall, I pride myself on delivering high-quality projects that not only meet but exceed client expectations, while also working collaboratively with team members to ensure that projects are delivered on time and to the highest standard.

About me

My name is Bekzod and I am a 20-year-old Frontend Developer currently working at Calypso IS. I have been passionate about programming and web development for a few years now, and I have gained considerable experience through various projects and working with more experienced colleagues.

I take great pride in my ability to learn quickly and adapt to new technologies and programming languages. In my current role, I have honed my skills in HTML, CSS, JavaScript, and various frontend frameworks. I am also familiar with version control systems like Git and have experience working with agile development methodologies.

I am constantly seeking to improve my skills and knowledge, as I believe that staying up-to-date with the latest trends and best practices is crucial to success in this field. In the future, I plan to transition into data science, where I can leverage my technical expertise and problem-solving skills to create innovative solutions.
